

Aftercare Maintenance

Following a good aftercare maintenance regime is highly recommended to ensure that your goods stay looking their best and help maintain their original lustre. Lamberts London offer a specialist selection of aftercare maintenance products to help you maintain the luxury aesthetic long after the original electroplating/lacquering process.

Microsuede Cloth

This cloth is made of 100% high-quality cotton. It is applicable for use on plated and lacquered surfaces. It can be used for general cleaning and maintenance and to remove light marks.

This cloth is machine washable and should be washed regularly to maintain performance. It should not be washed with conditioners, softeners, or bleach.

Although reusable, to ensure the best results, it is recommended that cloths are replaced on a regular basis. When not in use, the cloth should be stored in its original bag to protect it.

The product is fully recyclable. The cardboard carton and plastic bag can be placed into normal recycling bins. The cloth itself can be recycled in textile bins at waste recycling centres.

Code	Product	Type	Total (Exc VAT)	Total (Inc VAT)
00653	Microsuede Cloth (30cm x 45cm / 12" x 18")	Single Pack	£8.75*	£10.50*
00653_12	Microsuede Cloth (30cm x 45cm / 12" x 18")	Pack of x12	£87.48*	£104.97*

*All prices non-inclusive of postage and packaging costs.

Rouge Microsuede Cloth

This is a 100% cotton cloth, woven precisely for a density capable of holding heavy impregnation of cleaners and anti-tarnish agents. It is applicable for use with any metal but is especially effective for maintaining precious metals such as Gold, Silver and Rhodium. The main cleaning ingredient is jewellers rouge (iron oxide).

As the cloth is used, the polishing and cleaning agents are transferred to the item being wiped, leaving behind a black residue on the cloth. A smooth finish is left behind on the article as the cloth wipes away the polishing agents.

It is recommended that gloves are worn when using the cloth. It is always best practice to first use the cloth on an inconspicuous area, to ensure that there is no effect to the plated layer. For best results, use on parts before they have been fitted. If using on components that have already been fitted, it is advisable to protect the surrounding areas to prevent them from any potential staining.

The Rouge Microsuede cloth is not machine washable. Once the cloth has accumulated black on both sides, the cloth should be replaced. When not in use, the cloth should be stored in its original bag to protect it.

The product is fully recyclable. The cardboard carton and plastic bag can be placed into normal recycling bins. The cloth itself can be recycled in textile bins at waste recycling centres.

Code	Product	Type	Total (Exc VAT)	Total (Inc VAT)
00654	Rouge Microsuede Cloth (30cm x 45cm / 12" x 18")	Single Pack	£10.41*	£12.50*
00654_12	Rouge Microsuede Cloth (30cm x 45cm / 12" x 18")	Pack of x12	£104.16*	£124.95*

*All prices non-inclusive of postage and packaging costs.

Instructions for use:

Moisten one section of your cloth, and wipe over surface to remove surface contaminants, then delicately polish using a dry section of the cloth. Following the above steps frequently will ensure the surface remains in optimal condition.

Deionised Water

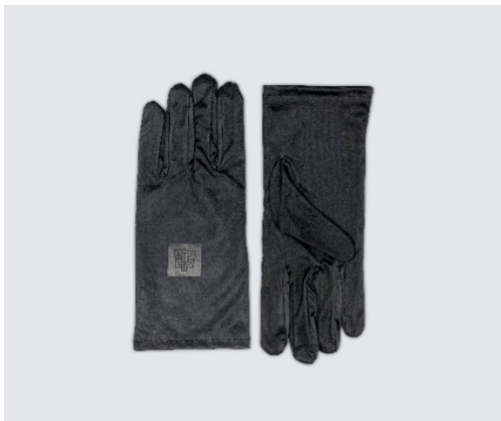

Lamberts London recommends using deionised water when cleaning your parts and in conjunction with our other aftercare maintenance products for optimal results. The purification of deionised water removes traces of salt and calcium. When used to clean parts, this ensures that stain marks are not left behind upon drying, ensuring a pristine finish for longer.

Code	Product	Type	Total (Exc VAT)	Total (Inc VAT)
00663	Deionised Water Bottle (50ml)	50ml – Plastic Bottle	£2.99*	£3.59*

*All prices non-inclusive of postage and packaging costs.

Instructions for use:

Remove cap from bottle. Two sprays of deionised water should be sufficient to moisten cloth for optimum cleaning. Use further deionised water if required. Once finished, replace cap back onto bottle.

Jewellers' Gloves

Lamberts London recommends careful handling of all plated parts. It is highly advised that gloves are worn when handling parts to protect against scratches.

For this purpose, Lamberts London offers exquisite black jewellers' gloves to ensure delicate handling of your luxury parts. These are made of soft microfibre and come branded with the Lamberts London logo icon.

Code	Product	Type	Total (Exc VAT)	Total (Inc VAT)
00661	Medium Jewellers' Gloves	Gloves	£8.75*	£10.50*
00662	Large Jewellers' Gloves	Gloves	£8.75*	£10.50*

*All prices non-inclusive of postage and packaging costs.
